

Not the Droids You Are Looking For, Pennsylvania

## Blind Build

### Objectives:

- Giving good instructions
- Trusting your teammate

### Materials:

- LEGO bricks
- Paper listing an object to build
- Blindfolds (optional)

### Setup:

- 1) Split the team up into pairs (one Builder who is blindfolded and one Instructor)
- 2) Leave a paper with an item for each pair to build

### Instructions to Team:

The Instructor may read the paper and find out what they need to build. He/She must provide the instructions to the Builder who is blindfolded

### Notes:

Make a list of possible builds with the pieces provided (e.g. "man on the edge of a diving board", "a car", "a duck")

You can vary this by the pieces you have available

You can also let the Builder decide what to build. If you do this, have each group explain what they were building at the end.
